DETAILED ACTION

EXAMINER'S AMENDMENT

1. The application has been amended as follows:

Claim 20, line 11, change "the ground" – the global ground –

Claim 20, line 12, change "devices of the SRAM" to – the SRAM device –

Claim 21, line 3, change "the virtual" to – the virtual ground --

Allowable Subject Matter

2. Claims 1-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a memory device comprising, in combination with other cited limitations, wherein potentials of the power line and the virtual ground cause the plurality of active devices to selectively operated in near subthreshold and/or superthreshold regimes in accordance with a mode of operation as recited in claims 1-10 and 11-19.

The prior art of record further fail to disclose a method for operating a transregional static random access memory (SRAM) device, comprising the steps of providing a virtual ground in an SRAM cell, which is selectively decoupled from a global ground by a first device ; providing a power line which is capacitively coupled to a wordline such that power is boosted above a supply voltage when the wordline activated; and maintaining a voltage difference between the powerline and one of the virtual ground and the global ground to selectively operate the SRAM device in a near subthreshold or superthreshold regime in accordance with a mode of operation as recited in claims 20-25.
